Biomedical Engineer | Technical Operations | Research & Digital Products

Medical technology · Scientific computing · Website and media operations

PROFILE

Biomedical engineer with multidisciplinary experience in medical-equipment supervision and repair, preclinical neuroscience research, scientific computing, technical education, e-commerce operations, SEO, multimedia production, and digital-product development. Combines hands-on technical judgment with structured analysis, clear technical communication, and end-to-end project delivery.

CORE COMPETENCIES

- Medical and dental equipment inspection and support
- Preclinical neuroscience and behavioral analysis
- Website administration, SEO, and e-commerce operations
- Course and educational-package development
- Customer consultation and digital product operations
- Biomedical instrumentation and neural recording
- Python, MATLAB, statistics, signal and image processing
- Technical documentation and scientific communication
- Video editing, motion graphics, and visual design
- Team coordination and project ownership

PROFESSIONAL EXPERIENCE

Medical Equipment Supervisor Engineer (Part-Time) | Peyramoon Teb Co.

Dec 2023-Mar 2026

Tehran, Iran

- Supervised medical and dental equipment across clinical settings; completed routine inspections, compliance checks, and technical assessments.
- Supported installation, maintenance coordination, troubleshooting, and communication with clinical centers.

Founder and Website Administrator | Sident.ir

Apr 2020-Present

Tehran, Iran

- Built and operated an online medical and dental equipment store covering product management, website administration, SEO, content, customer relations, and digital sales operations.
- Combined technical product knowledge with evidence-based product communication and marketplace execution.

Technical and Educational Content Manager | Tech Academy (academy-tech.ir)

Dec 2023-Present

Tehran, Iran

- Managed website setup, technical administration, educational content, course production, presentation systems, and SEO.
- Recorded a 40-hour MATLAB course consisting of 38 sessions.

Medical Equipment Repair Technician | Vistatech-Pishro & Vista Co.

Mar 2023-May 2023

Tehran, Iran

- Completed an internship and subsequent specialist work in sterilization and laboratory-equipment maintenance.
- Worked with autoclaves, ultrasonic devices, sterilization systems, dental handpieces, and basic laboratory equipment.

Freelance Multimedia Producer and Content Creator | Independent

Aug 2020-Feb 2023

Istanbul, Turkey / Remote

- Produced video edits, motion graphics, website content, social-media branding, promotional assets, and presentation systems.
- Managed social media for Nix Broker and produced 15 promotional videos; mentored a graphic-design team for the Amirkabir International Winter School of MBA.

Content Creator (Part-Time) | Irandec.com

Sep 2018-Feb 2020

Remote

- Created product descriptions, digital content, and marketing materials for an online retail platform.

SELECTED RESEARCH AND ENGINEERING PROJECTS

Neuromodulation and Behavioral Analysis Project | Graduate Research

2023-2026

Tehran, Iran

- Supported a preclinical DBS study using a unilateral 6-OHDA model, behavioral testing, video scoring, Python analysis, repeated-measures statistics, and scientific visualization.
- Prepared publication-oriented methods, results, supplementary materials, graphical abstracts, and reproducible analytical documentation.

Custom Neural Potential Recording Device | Bachelor's Engineering Project

2021-2022

Tehran, Iran

- Designed and developed a custom-built system for recording neural potentials, integrating instrumentation, signal acquisition, circuit development, and system testing.

MATLAB Instructor | Amirkabir University of Technology, International Neuroscience School

Nov 2025

Tehran, Iran

- Designed and delivered six practical sessions (12 hours) on MATLAB applications in neuroscience.

EDUCATION

M.Sc. in Biomedical Engineering (Bioelectric) | Iran University of Science and Technology

2023-2026

Tehran, Iran

- Focus: neural engineering, machine learning, signal processing, image processing, and neuromodulation.

B.Sc. in Biomedical Engineering | Islamic Azad University, Tehran East

2019-2022

Tehran, Iran

- GPA: 18.68/20; bachelor's project in custom neural-potential recording instrumentation.
